1. Introduction

This document includes a report on achieved results of WP2 “Printing bachelor’s degree curricula” within task 2.1.4. for the project entitled “**Development and Implementation of Multimedia and Digital Television Curricula**”.

The revised and updated bachelor curriculum of Multimedia and Digital Television (MDTV) is an important task of the DiMTV project. The revision of the bachelor curriculum went through the process of proposing from the UAMD team group and discussions within the consortium partners.

The printed bachelor curriculum is organized in the form of a book. This book is designed by the MDTV student Brolin Dakoli. In the following sections, it is shortly described the content of the book.

Furthermore, the University of Prishtina has printed the Bachelor curriculum book for the study program Information Communication Technologies (ICT).

2. The printed bachelor book

The printed bachelor book is done in two languages English and Albanian. The opening phrase for the book is “ENTER THE WORLD - MULTIMEDIA AND DIGITAL TELEVISION (MDTV)”, used to describe the multimedia field and how deep you can go with creativity.

2.1 The printed book content

The book is composed of the following sections:

1. **Introduction** – a short description of the Multimedia and Digital Television study program.
2. **Study Program objectives** – describe the objectives defined in the Deliverable 2.1.3
3. **Learning objectives of the program** – consists of the knowledge and skills achieved by graduated students during courses of study.
4. **Student Competences of the program** – describes what students will learn after finishing the bachelor degree in MDTV.
5. **Learning Skills**
6. **MDTV Bachelor Degree Curriculum** – the curriculum is divided into 3 academic years. Each academic year has 2 semesters. In each semester there are 5 courses: 4 compulsory and 1 elective. The bachelor curriculum is composed of 30 courses.
7. **Course syllabuses** – each syllabus describes the aim and objectives; subjects and topics covered; evaluation; and literature.

For more detailed information you can find the [Revised Bachelor degree curricula book](#).

3. The printed Bachelor catalogue - UP

The exponential growth and widespread application of Information and Communication Technologies (ICT) in all fields of modern society has positioned this sector as one of the main supports/pillars of the country's economy and beyond, thus creating the need for more ICT professionals with relevant university degrees.

University graduate professionals should not only be able to fulfill the current market needs but also have the ability to exploit opportunities that new technologies offer. The graduates of this study program should be able to understand and respond to new information and communication technologies relevant to industry needs, they should be prepared to pursue master studies in the same or comparable field of study, and should have a good basis and incentive for further independent study within the framework of lifelong learning.

Information Communication Technologies (ICT) is a bachelor study program offered at the Faculty of Electrical and Computer Engineering at the University of Prishtina. The mission of the ICT study program is to prepare and deliver graduates who will be able to enhance productivity, innovation, and market competitiveness both in-country and worldwide. The proposed program integrates the theory developed with modern teaching methods as well as the practice carried out in the relevant ICT laboratories in FECE for different courses. Some parts of the program were developed based on the ERSAMUS+ DIMTV project.

For more detailed information you can find the [Bachelor Catalogue \(UP\)](#).
